

Q & A

1. **What makes this program so special?**

It is the strategy we apply. This multidimensional and non-linear strategy is based on the core principles of applied metaphysics and quantum psychology. This 100% approach has proven its efficacy; it begins outside known frames of reference and transcends all traditional models and methodologies. This quantum wisdom connects science, business administration, psychology, philosophy, and business spirituality. Through this powerful synthesis, we dismantle core illusions and ingrained patterns, enabling participants to free themselves from past baggage on their own strength. This brings unprecedented inner peace and space. I describe this strategy in my latest book, *"Recipe for World Peace,"* which is set to be published in November 2026.

2. **Why does the program last 24 months?**

Thirty years of training experience demonstrates that people need this time to integrate the core principles of Personal Excellence at a cellular level. This integration is essential to remain in that clear, high-frequency state of being present 24/7—staying true to your own core values, regardless of your role or circumstances. The state of Personal Excellence forms the foundation for Excellent Governance, Business Elegance, and Excellent Leadership: purposeful, ethical, integer, and authentic.

3. **Who qualifies for this program?**

Game-changers with a passion for innovation, a Next-Generation mindset, and a Global Vision. Pioneers who acknowledge that peace begins within yourself. Global citizens who are 100% committed and willing to look into the mirror of their own functioning. Mentors who want to collaborate as role models with Young Heroes. Anyone who is curious about lasting solutions.

4. **What does participating in the Global Peace Building Program mean?**

Thinking big and transcendently, overcoming fears, and learning to practically apply universal laws, values, and energy frequencies. In this high-frequency reality, the transformation everyone dreams of manifests, giving everyone energy, inspiration, and wings. Because we set right what has gone wrong, break through ingrained patterns, and dismantle core illusions, it creates autonomy, self-reliance, and visionary leadership. Activating and uniting decisiveness, innovative power, resilience, and imagination ensures people maintain their focus. Guided by a clear ROADMAP for the next 24 months, we align all visions in the same direction. Where minds are aligned, problems dissolve and goals are achieved.

5. **What do we need to realize world peace?**

- A universal and holistic strategy that works always, everywhere, and for everyone.
- A clear action plan for the coming year.
- A growing team of frontrunners who think big, persevere where others give up, and set right what has gone wrong—game-changers who use the unified moral compass of universal core values as their reference framework.
- A budget that allows us to train and educate Young Heroes worldwide as peace-pioneers and Global Peace Building trainers.
